

Het Ladani

Full Stack Web Developer

hetladani2019@gmail.com | 9574440325 | Ahmedabad, India

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

EDUCATION

B.Tech Computer Science Engineering
Silver Oak University

2024 – Present
CGPA: 08.43

B. S. Data Science and Applications
Indian Institute of Technology Madras

2024 – Present
CGPA: 08.28

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Java, Python, SQL, NoSQL

Frontend: React, Tailwind CSS, Bootstrap, React Router, Vite

Backend: Node.js, Express.js, Flask

Databases: MongoDB, PostgreSQL

CS Fundamentals: DSA, OOPs, DBMS, OS

Operating System: Windows, Linux

Other Skills: Git, GitHub, REST APIs, CRUD, Postman, Antigravity, Vibe Coding, JWT, bcrypt, Cloudinary

PROJECTS

IndiGro: Full-Stack Grocery Delivery Platform

[Live](#) | [GitHub](#)

Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL

- Engineered a full-stack e-commerce application with a complete checkout flow and secure Stripe payment integration.
- Architected a relational database using PostgreSQL and Prisma ORM to manage users, products, addresses, and delivery partners.
- Implemented a real-time delivery tracking system using Leaflet maps with live location updates and OTP verification.
- Built a secure authentication 3-tier system (Customer, Admin, Rider dashboards) using JWT and bcrypt.
- Integrated Cloudinary with Multer for optimized, cloud-based image storage.

DevHub: Real-Time Code Collaboration Platform

[Live](#) | [GitHub](#)

Tech Stack: React, Flask, PostgreSQL, Socket.io, Google Gemini AI, Antigravity

- Architected a full-stack real-time collaboration environment using AI-agent and prompt engineering.
- Implemented bidirectional real-time communication using Socket.io and Flask, enabling multiple users to synchronize live code editing across secure rooms.
- Designed the prompts to seamlessly integrate the Google Gemini API into the backend, autonomously generating context-aware code reviews and architectural feedback for users.
- Guided the autonomous generation of a responsive frontend utilizing React, Tailwind CSS to handle complex state management and dynamic syntax highlighting.

NextCall: Real-Time Video Conferencing Platform

[Live](#) | [GitHub](#)

Tech Stack: PostgreSQL, Express, React, Node.js, TypeScript, Prisma, Stream.io SDK

- Integrated the **Stream.io Video SDK** to deliver **high-quality real-time video conferencing**, screen-sharing capabilities, and custom camera/microphone setup screens.
- Developed scheduling modules using **Express and React Router** to organize meeting codes, list upcoming calendar sessions, and manage persistent personal call rooms.
- Structured a **PostgreSQL database schema via Prisma ORM** and engineered parallel query dashboards to fetch, preview, and play back call recordings.

ACHIEVEMENTS

- Solved 170+ LeetCode questions
- Participated in ODOO Hackathon

CERTIFICATES

- Full Stack Web Development – Apna College
- Data Structures & Algorithms – Apna College
- GeeksforGeeks 160 Days of Code
- Linux Fundamentals – DevTown
